

Soohyun Choi

Integrated M.S./Ph.D. Student in Electronic Engineering | Reinforcement Learning
Hanyang University • Information and Intelligence Systems Lab (IISL) • Seoul, Republic of Korea
petersun0221@hanyang.ac.kr | schoish.github.io | github.com/SChoish

Research Interests

Reinforcement learning and sequential decision making, with emphasis on iterative policy improvement, offline goal-conditioned RL, and generative long-horizon state-space planning.

Education

Hanyang University

Sep. 2024–Present

Integrated M.S./Ph.D. Program in Electronic Engineering

Information and Intelligence Systems Lab (IISL) • Advisor: Prof. Songnam Hong

Hanyang University

2018–2024

B.S. in Electronic Engineering • Summa Cum Laude

Manuscripts & Research Projects

PathBridger: Subgoal Bridges for Offline Goal-Conditioned Reinforcement Learning

2026

Soohyun Choi, Seonvin Cho*, and Songnam Hong • Under review • *Equal contribution • [Code](#)*

Developed a hierarchical offline GCRL framework that connects subgoal selection to short-horizon execution through state-space bridges, inverse dynamics, and execution-time replanning.

ALARM: Attention and Line Search Based Analog Circuit Optimization on a Riemannian

2024; rev. 2026

Manifold

Soohyun Choi, Minseok Oh, and Ickhyun Song • Undergraduate capstone technical report • [Report](#)

Formulated designer-selected performance equivalence classes and quotient geometry for circuit search; achieved 10/10 success with 33.2 SPICE evaluations on average in the archived VCO study.

Ongoing Research

Multi-step Proximal Policy Improvement

2026–Present

Study re-centered, critic-guided proximal refinement and how step size and refinement depth shape stability across policy-improvement budgets and critic regimes. [\[Code\]](#)

PathFlower: Goal-Conditioned State Flows

Ongoing

Extend PathBridger toward final-goal-conditioned generative state flows that produce useful intermediate states for long-horizon offline control.

Adaptive Policy Optimization

Ongoing

Develop adaptive policy refinement that determines when and how far to update under uncertain critic guidance.

Honors & Funding

Top Excellence Award - Alumni Association Special Award (KRW 1,000,000)

2023

Top Excellence Award - 15th Capstone Design Fair (KRW 1,000,000)

2023

Graduation Honors, Hanyang University

2024

BK Research Assistantship (Spring–Fall), Hanyang University

2026

Selected Graduate Coursework

Learning & Control: Machine Learning; Robot Learning; Advanced Optimal Control Theory

Probability & Analysis: Probability and Statistics; Stochastic Processes; Uncertainty Quantification; Functional Analysis I
